

Mitrache Petru Cosmin

Salonta, Romania | petru0cosmin@gmail.com | (+4) 0759506037

PROFESSIONAL SUMMARY

Engineer with experience in software development, automation, and infrastructure-aware systems. Focused on transitioning into Data Center Operations and Critical Environment roles, with interest in power systems, system reliability, and high-availability environments.

CORE COMPETENCIES

Infrastructure & Critical Environment: Power systems basics, redundancy, monitoring, reliability

IT & Cloud: Azure basics, networking fundamentals, storage systems

Programming: C#, Python, Java, SQL, MATLAB, C/C++

Technologies: .NET, WPF, OpenCV, RTSP, Git, Windows Server

PROFESSIONAL EXPERIENCE

Software Engineer – Personal Projects (2023 – Present)

Developed real-time video processing applications using C#, WPF, and OpenCV. Implemented RTSP pipelines, detection systems, and optimized performance for continuous operation.

Web Developer – Laravel & API (2022 – Present)

Built REST APIs, authentication systems, and integrated external services. Focused on backend reliability and system performance.

E-commerce Systems (2021 – Present)

Deployed and optimized WooCommerce, PrestaShop, Magento platforms. Ensured uptime and system performance.

Android Developer (2020 – Present)

Developed mobile apps with backend integration and data synchronization.

EDUCATION

Master – Advanced Electrical Engineering Systems (2025 – Present)

Bachelor – Electrical Engineering & IT (2021 – 2025)

Bachelor – International Relations (2007 – 2010)

PROJECT HIGHLIGHTS

Intelligent Video Surveillance System – RTSP, OpenCV, real-time detection

Image Processing – MATLAB algorithms implementation

Hardware Projects – 3D printer, CNC, XY plotter

CERTIFICATIONS (PLANNED)

ITIL Foundation, Uptime Institute ATS, Azure AZ-900/AZ-104
